The terminal disclaimer filed on 5/11/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,670,574 has been reviewed and is accepted. The terminal disclaimer has been recorded.

The following is an examiner's statement of reasons for allowance: the claims as supported by the specification differs from the prior art in that it does not teach monitoring of a laser weld which uses a sensor, data acquisition and processing of the analyzed weld data and runs a library of algorithms with respect to a weld characteristic and the prior art does not teach adjusting a focus height of a laser, performing a plurality of test welds and capturing a temperature characteristic of each test weld in order to determine the focus height that results in a maximum rising slope in the temperature characteristic as a correct focus height.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
